About

Aspiring Front-End Developer with a strong foundation in C, C++, HTML, CSS, JavaScript, and Data Structures & Algorithms. Passionate about building responsive and user-friendly web applications and collaborating on real-world software projects. Focused on scalable development, clean UI/UX, and continuous learning, aiming to grow into full-stack development.

Technical Skills

- **Programming Languages:** C, Java, Python, SQL
- **Web Development:** HTML, CSS, JavaScript
- **Problem Solving:** Data Structures & Algorithms (DSA), Competitive Programming
- **Tools & Platforms:** GitHub, VS Code, MongoDB Atlas (Learning)

Education

B.Tech – Computer Science & Engineering **Expected 2027**
Galgotias College of Engineering & Technology
Specialization: Artificial Intelligence and Machine Learning

Class XII: 81%
Class X: 80.2%

Projects

Uniserve CRM – Complaint Management System

- Developed a complaint management system with a responsive and user-friendly interface.
- Built interactive forms and dynamic data rendering using HTML, CSS, and JavaScript.
- Integrated REST APIs and collaborated with the backend team for seamless data exchange.

Learning Management System Website

- Developed a platform for managing courses, assignments, and student progress.
- Built a responsive user interface using HTML, CSS, and JavaScript for smooth navigation.
- Designed dashboards for students and instructors to view courses and performance insights.

Mental Health Chatbot

- Developed an AI chatbot to provide basic mental health guidance and empathetic responses.
- Built the frontend using HTML, CSS, and JavaScript with a Python Flask backend.
- Used NLP to process user input and generate appropriate chatbot responses.

Certificates

- **Problem Solving** – LeetCode (Sept 2026)
- **Database Management System (DBMS)** – Infosys Springboard
